

# BE SAFE AROUND NATURAL GAS

## SUSPECT A LEAK? TAKE ACTION!

1 LEAVE.

If you ever detect a natural gas leak, LEAVE IMMEDIATELY. Don't try to find or stop the leak.

2 DO NOT TOUCH ANYTHING ELECTRICAL

Leave the building immediately. <u>Do not</u> use a phone. <u>Do not</u> smoke. <u>Do not</u> turn appliances or lights on or off. <u>Do not</u> operate any vehicle or equipment that could create a spark.

(3) CALL 911

Once you are out of the suspected area, immediately call 911.

Beaches Energy is committed to keeping our customers safe. That's why we follow state and federal regulations while performing extensive quality control checks. We also make it a priority to keep you informed on how to recognize and prevent natural gas leaks.

# CALL BEFORE YOU DIG: IT'S THE LAW.

Building a deck? Planting a tree? Installing a mailbox? Don't break the law – call 811 before you begin any digging project.

Excavation work, including simple yard digging, is the most common cause of natural gas emergencies. Before excavation of any kind – even small projects like planting shrubs – state law requires that you call 811 so all utility lines can be professionally marked before you begin. If you hit an underground utility line while digging, you can harm yourself or those around you, disrupt service to an entire neighborhood, and potentially be responsible for fines and repair costs.

## ENERGY STAR® APPLIANCES: A SMART INVESTMENT

The price of a major appliance is not only its initial cost, but also the cost of the electricity it uses over its lifetime. Appliances that operate efficiently, like ENERGY STAR® rated versions, use 10–50% less energy and water than standard models.

With rigorous testing standards and guaranteed premium features, they also require less repair and maintenance. To find out more information on appliance savings and available rebates, visit www.beachesenergy.com and click on ENERGY STAR®.

Qualified Products or Improvements	Maximum Rebate
