SHOW YOU CARE

The CARE Program is a Beaches Energy outreach program that provides assistance to Beaches Energy customers that are unable to pay their utility bill due to financial hardship.

The CARE program depends on your help to make it work:

- It's easy to give back to the community through monthly or a one-time donation. Every dollar counts.
- Beaches Energy will match all contributions, doubling the impact of your generosity.
- 100% of all contributions go directly to people in need in our beaches community.

In 2018, the CARE program provided financial assistance to help 327 Beaches Energy customers keep their electricity on.

How Can I Help?

COMMUNITY HAPPENINGS

Don't miss Deck the Chairs, an annual lighted display of decorated Jacksonville Beaches lifeguard chairs — Now through January 1. Info at www.deckthechairs.org.

KEEP YOUR HOME SAFE THIS HOLIDAY SEASON

Consider safety at every step when preparing your home and family for happy gatherings. Here are some ways to ensure your home is safely aglow this holiday season:

- **Flameless is safest.** Avoid using candles by switching to battery-operated flameless candles. Many LED flickering flameless candles deliver the same ambience as candles without the worries.
- **Tree position is important.** Place your indoor tree away from fireplaces and doorways. Heaters can cause cut trees to dry out, so keep the stand filled with water. Use only non-combustible or flame retardant materials to trim your tree.
- **Always test electronic decorations and light strings.** Only use those with UL labeling, and make sure outside decorations are intended for use outdoors. Discard and replace strings with frayed or damaged wiring or plugs. Energy-efficient LED light strings shine cooler and brighter than standard strings and last for many years.
- **Don't overload.** It's best to use surge protectors when plugging in multiple light strands, but never plug more than three standard sized light sets per single extension cord. Never pull lights out by the cord, use the plug when pulling from the wall socket.

ELECTRIC PRICE FOR 1,000 KILOWATT-HOURS

Rate Component	November	December
Residential Base Charge	\$4.50	\$4.50
KWH base charge	\$83.57	\$83.57
