GET TO KNOW OUR METER READERS!

Each of Beaches Energy's 35,000 customers has an electric meter at their home. From Neptune Beach to Palm Valley, Beaches Energy meter readers visit neighborhoods throughout the month to read your home's electric meters.

We know seeing someone unexpected in your yard can be alarming, but it's important for meter readers to access your meter (located in the front, side or rear of your home). This allows us to see your home's kilowatt energy consumption and create your monthly utility bill.

Here's what you can expect:

- Readers may arrive any time between 7:00am - 4:00pm weekdays.
- Your meter reader will read your meter at least once per month.
- Meter readers will always represent the Beaches Energy logo on their uniform and carry City of Jacksonville Beach identification.
 - **Summer:** Due to the heat, meter readers wear a blue, dri-fit t-shirt and sometimes a hat with the Beaches Energy logo.
 - **Winter:** Meter readers may wear a hooded sweatshirt or jacket with the Beaches Energy logo.
 - They will have a white truck with the Beaches Energy logo parked within the neighborhood.
 - They will be carrying a large cell phone-sized device used to read the meter.
- Meter technicians visiting to repair your meter will wear dark gray, fire-resistant, long-sleeve shirts and jeans.

Beaches Energy meter reading and technician team

If you are ever concerned, please call **904-247-6241** to confirm if your meter is scheduled for a reading. You are also encouraged to talk to your meter reader. They can show you where your meter is located, and are happy to answer any questions.

We take your concerns seriously, and we never want to make anyone feel uncomfortable. It's our goal to make this process as easy as possible and ensure everyone is safe - both customers and our dedicated employees!

STORM CLEANUP & RECOVERY DON'T MAKE A DIFFICULT SITUATION WORSE. CALL 811.

Hurricanes are nothing new to Beaches residents, but when a storm leaves a trail of broken fences and toppled trees, cleanup can take center stage with little thought of anything else.

Before you begin any storm cleanup involving digging or distributing the ground — like removing uprooted trees — call 811.

Calling 811 helps protect you from utility outages, accidents, and serious injury caused by digging into underground utility lines. After calling 811, wait two days for buried utility lines to be marked. Then dig with care. For more information, visit www.Call811.com.
