SAVE MONEY THIS HOLIDAY SEASON

Everyone knows a jolly holiday season starts with saving money where you can. While we can't help you find great deals on your holiday wish lists or settle your family's latest bet, we can help you save on your utility bills. Here are a few simple energy-saving tips to implement this season:

DECORATE WISELY – Shopping for holiday décor? Opt for non-electric decorations like wreaths, garlands, art pieces and more. When you need to use lights, choose energy-efficient LEDs, battery-operated items or fiber optics.

WATCH YOUR WASTE – When you leave home, make sure your lights and decorations are turned off and any “phantom energy” users are unplugged. This includes your TV, game consoles, laptop chargers, small appliances and more.

PLAN YOUR FEAST – You can save a surprising amount of energy when you avoid the oven. While preparing your family meal, bake multiple items at once or opt for small appliances, saving your oven for large items like a turkey.

LOWER THE HEAT – Stay warm and energy-efficient by investing in a programmable thermostat to automatically adjust the temperature based on your schedule.

Got 5 minutes? Get personalized money- and energy-saving tips with My Utility Planner.

UNWRAP HOLIDAY SCAMS

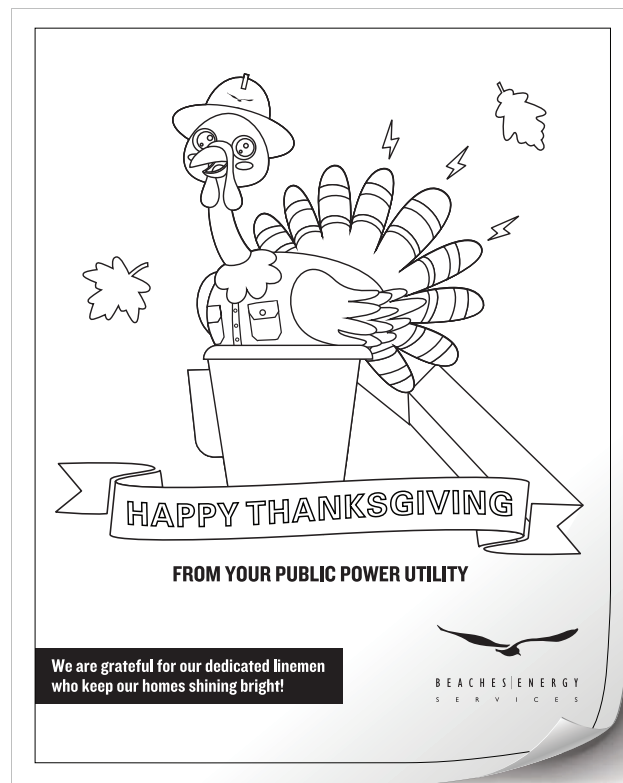

With the holidays right around the corner, scammers will be particularly active. The best way to protect yourself and your loved ones is to brush up on common utility scams. The scams our customers report most often are calls for payment or unsolicited offers for a free home audit.

Remember: our team will never demand instant payment over the phone. If you're worried a call may be fake, hang up and call us back.
