HELPING NEIGHBORS IN NEED

Looking for an easy way to give to those in need this holiday season? The Beaches Energy CARE program is a great place to start. The CARE Program is a community outreach program that provides financial assistance to neighbors experiencing financial hardship, including:

65+ SENIOR CITIZENS

PEOPLE WITH DISABILITIES

LOW-INCOME FAMILIES

EMERGENCY AND DISASTER RELIEF

In 2022, the CARE program helped 227 customers keep the lights on through community donations and Beaches Energy contribution matches.

REPORT STREETLIGHT OUTAGES

To help keep our communities safe and comfortable, Beaches Energy works to quickly repair streetlight outages, but we need your help! When you see an outage, report it on BeachesEnergy.com or by calling **904-247-6171**.

IS YOUR REFRIGERATOR RUNNING EFFICIENTLY?

When your refrigerator isn't running like it used to, these tips can help you keep it working as efficiently as possible until you can get it repaired or replaced:

- 1. Check the temperature** – Keep your refrigerator between 35 and 38 degrees for maximum efficiency.
- 2. Keep it clean** – Clean condenser coils at least once a year to keep your fridge running well.
- 3. Give it space** – Keep your fridge a few inches away from the wall to help air flow smoothly.
- 4. Replace old seals** – Regularly check door seals for leaks and replace any spots where air can escape.
