SPRING CLEANING MEANS SUMMER SAVINGS

Spring cleaning on your mind? Here are a few simple tasks to add to your checklist that will help keep your home running smoothly and your bill lower as the weather heats up.

Clean the Fridge

Next time you're cleaning out the fridge, also dust the coils and clean up door seals. This will keep your food fresh and your refrigerator running efficiently.

Replace Filters

Replacing filters in your home's HVAC system and other appliances is a simple way to ensure you're breathing easier and using less energy.

Scrub the Windows

Cleaning window frames helps your windows look and move better. This gives you a chance to inspect seals and check for leaks that could be letting cool air out.

Upgrade Your Tech

While you're decluttering, look for opportunities to swap old appliances and electronics for newer, more efficient models that can help reduce your utility bill!

A SIMPLE WAY TO MAKE AN IMPACT

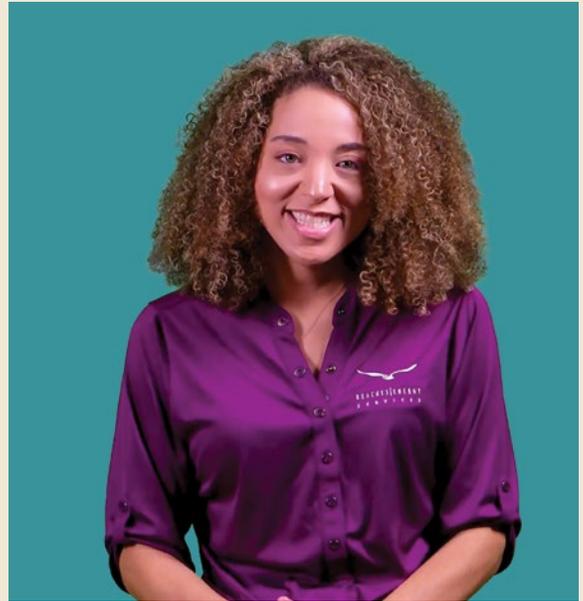

Earth Hour is a global initiative from the World Wildlife Fund that encourages people to come together and spend just one hour doing something positive for the planet. This year, Earth Hour is celebrating its 20th year of impact. Want to join? Try one of these activities:

- Hit the beach - or backyard - for some stargazing
- Look for cool plants and animals in nature
- Cook a zero-waste meal for friends and family
- Switch off electronics and join an Earth Hour event

Find a local event and explore other ways to celebrate at EarthHour.org.

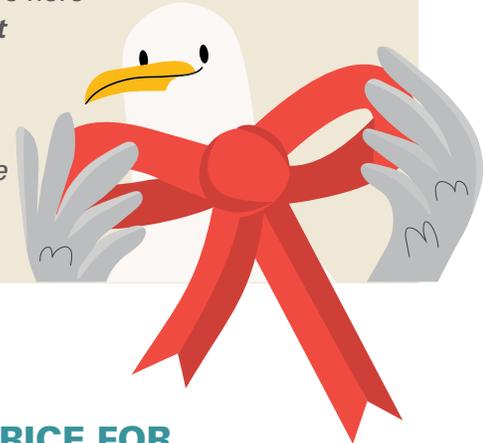

EMPLOYEE SPOTLIGHT

"Every person has a different set of needs and assistance they need from us ... when we're able to deliver that and tie it up with a little bow ... and they feel like they've gotten truly wonderful service from us – that's what we're here for. *That's what it's all about.*"

Vicki Tuddles
Customer Care Lead
